CAREER OBJECTIVES

I am looking forward for an opportunity to contribute to the organization's growth and build a strong professional career. With the aspiration of continuous improvement, learning, developing technical skills in the updated technologies and the experience in Projects handling/executing, I ensure to fulfill the expectations set by the organization.

PROJECTS

1) ARMY DATABASE MANAGEMENT SYSTEM

Army database management system is a database application which helps soldiers and management of the army to get the details of soldiers and related data.I implemented this mini project using HTML, PHP and MYSQL.**I have configured input screens as part of the user interface to retrieve, update and store the data into the Database. Solved and fixed the issues encountered in connection between the front end and the database.**

2) MUSIC PLAYER APPLICATION

Music player is an android application to play music. This project is implemented by JAVA language. **As a team member I was involved in the development of fetching the song from the internal storage and then playing in the application.** I configured the buttons like play, pause and resume to cater this functionality.

3) WEB DEVELOPMENT PROJECTS

- **PERSONAL PORTFOLIO WEBSITE**

A personal portfolio website provides information of the respective person on the academic details, projects etc. This is developed using HTML and CSS.

- **FLIPKART WEBSITE**

This is an e commerce website which provides cost and details of various items. This is developed using HTML and CSS.

EXPERIENCE

Machine Learning Intern

Mitra Softwares - Shimoga, Karnataka

08/2022 - 09/2022

The Main objective of project was to propose an automatic method for the detection of **Kyasanur forest disease Detection**. The project is precise,accurate and the proposed work is user friendly to use.
